

We are looking for a passionate back-end developer to join the team and make an immediate impact to better our ecommerce platforms and websites! You should be comfortable with a fast pace environment, consistent improvements on our ecommerce sites and backend as well as structured timelines and integral involvement in project development. We are a dedicated team who share a love for all things tech and making a shopping experience the customer would love to come back to. We strive to produce clean code that we are proud of. With a constantly evolving project backlog, we rely on strong collaboration while still providing the freedom for you to work independently.

#### **REQUIREMENTS:**

- Proficient in the .NET technology stack
- Skillful with Microsoft SQL & SQL Server
- Experience with personal project management
- Time management, internal and external communication
- Passion for writing clean, maintainable code

#### **YOU WILL:**

- Assist in all aspects of a development project, from gathering requirements, planning, writing code, and deployment
- Be performing self-directed work as well as pairing with other team members to help strengthen our core knowledge base
- Take full ownership of projects
- Contribute to projects throughout the entire stack (front-end and back-end) through technical, conceptual and verbal skills
- Consistently attempt to deliver innovative web applications
- Grow our company culture with new ideas and perspectives

#### **SKILLS WE'D LIKE TO SEE:**

- Professional experience with ASP.NET MVC, C#
- A known community presence (blogging, speaking, networking)
- Strong knowledge of JavaScript/jQuery

As a member of the CompSource Development team, you will have the freedom to make decisions affecting your personal technology stack, daily work priorities and environment.

Not sure you're qualified for this position? Apply anyway. We're always looking for motivated people with a thirst for knowledge.

## **OUR VALUES**

- Be appreciative
- Take ownership
- Be upfront and honest
- Be prepared
- Do the most valuable thing first
- Ask good questions
